

Brave Voices™

SPEAK UP TO PROTECT CHILDREN

May our collective
roar become so loud
that the world cannot
help but listen!

DID YOU KNOW?

- There are more children experiencing the trauma of sexual abuse than there are children battling cancer.
- 90% of child sexual assault is committed by someone the child knows and trusts.
- Most sexual assault happens in homes, youth organizations, schools and places of faith.
- 30-50% of assault is committed by youth.

HOW YOU CAN HELP!

In youth organizations, set up a system so a child is never alone with an older child or an adult.

Do not ask children to keep secrets, even "innocent" ones.

Respect children's boundaries (e.g., kissing, tickling or patting butts).

If you see something that doesn't feel right, speak up and get help.
